**OtoClear® Ear Irrigation Tip**

Bionix OtoClear Ear Irrigation helps healthcare workers provide safe and comfortable ear irrigation without the backsplash, at half the cost of a self-constructed device.

**PROBLEM:**

Traditional ear irrigation shoots water directly into the ear canal, which can be painful, dangerous and messy.

**SOLUTION:**

OtoClear Ear Irrigation Tips, with Gentle Touch Design, directs water to the ear canal wall, with three divergent streams, instead of directly at the Tympanic Membrane. And the flared design prevents backsplash.

**RESULTS:**

A safe, clean ear irrigation tip at half the cost of a self-constructed device.

**PRODUCT OFFERING**

#7200 - 40 single-use tips per box  
#7240 - OtoClear/TableTop Ear Lavage, 5 tips  
#7270 - OtoClear/Aquabot, 20 tips

*“OtoClear” Tips - U.S. Patent #6,706,023. Waterpik® is a registered trademark of Water Pik, Inc.  
The OtoClear® Ear Irrigation Tip is not affiliated with Water Pik Technologies, Inc.

Our office is very happy with the soft (OtoClear) tips. They are easier to maneuver in the ear canal and more comfortable for the patient.  
- Laura Griffith, MA
**OTOCLEAR® EAR IRRIGATION SYSTEMS**

OtoClear Tips were designed for compatibility with multiple delivery devices. With each delivery device, OtoClear delivers predictable effectiveness and is the ultimate in safe ear irrigation.

### #7280
**Ear Lavage System**
*Recommended for high volume facilities*
- A completely portable irrigation delivery device that can be used for procedures anywhere in or out of the office.
- Provides effective, pulsed irrigation.
- Electronic pressure control system with 3 settings.
- Proven safety & effectiveness. *(Children's Hospital of Pittsburgh Study)*
- Rechargeable battery.
- 210ml self-contained water reservoir.

System Includes:
- 1 Portable Waterpik®
- 40 OtoClear Tips
- 1 Ear Basin

### #7290
**OtoClear SprayWash Kit**
*Recommended for low volume facilities*
- Delivers greater volume compared to syringes or other manual devices.
- Efficient design allows for two-handed procedure.

Kit Includes:
- 1 SprayWash Bottle
- 20 OtoClear Tips
- 1 Ear Basin

### #7270
**OtoClear Powered by Aquabot®**
*Recommended for low volume facilities*
- Delivers greater volume compared to syringes or other manual devices.
- Efficient design allows for two-handed procedure.

Includes:
- 1 Aquabot® Bottle
- 20 OtoClear Tips
- 1 Ear Basin

*Only available in U.S.*

---

**USAGE INSTRUCTIONS**

1. **Insert OtoClear tip fully into the ear canal.** The flared design of the OtoClear tip protects against over-insertion.
2. **Begin irrigation.** Note: The OtoClear tip directs the water towards the walls of the ear canal creating a turbulent lavage that effectively dislodges the cerumen. The exit portals control backsplash and deliver the effluent into the basin.
3. **When procedure is complete,** remove and dispose of the single-use OtoClear tip.

:*Thoroughly read the complete directions before using the OtoClear Ear Irrigation tip. Do not perform irrigation if perforations or tympanostomy tubes are present or suspected. Discontinue irrigation immediately if bleeding, irritation or other trauma to the ear canal or tympanic membrane occurs. Hard or impacted wax may require a cerumenolytic agent.*
